

## Часть I

## СОДЕРЖАНИЕ

1. Aripov M., Khajdarov A. To numerical modeling of some nonlinear system of reaction-diffusion type .....	11
2. Beisel S.A., Chubarov L.B., Kit E., Levin A., Shokin Yu.I., Sladkevich M. Tsunami near the Israeli coast: preliminary results of numerical modeling .....	17
3. Dedner A., Kloeckorn R., Kröner D. Efficient higher order methods for convection dominated problems on unstructured grids and applications .....	25
4. Drummond J. Philip, Danehy Paul M., Bivolaru Daniel, Gaffney Richard L., Tedder Sarah A. and Cutler Andrew D. Supersonic Combustion Research at NASA .....	36
5. Jian-Ping Wang and Yang Liu Finite spectral element method for viscous flows with structured and unstructured mesh .....	46
6. Kananthai A. On the Generalized Nonlinear Equation related to the Heat Equation and its spectrum .....	49
7. Klöforn R., Shokina N. Dune, the distributed and unified numerics environment introduction with application .....	56
8. Mousa M.M., Kaltayev A. Investigation Of Chemical Reaction And Magnetic Field Effects On Viscous Flow Over A Nonlinearly Stretching Sheet By A Homotopy Perturbation Padé Technique .....	64
9. Potemkin V.L., Makukhin V.L. Atmospheric transfer of heavy metals over south-eastern Siberia .....	72
10. Rajevic M., Petkovic D., Vujakovic J., Radenkovic N. Support of decision making by business intelligence tools .....	75
11. Shao Ye-Tao, Wang Jian-Ping, Fujiwara Toshitaka Two dimensional simulation of continuous detonation engine .....	82
12. Yuldashev Z.Kh., Ibragimov A.A. Analysis of total error of interval variant of cyclical run .....	83
13. Абдукодилов А.А. О возможностях применения системы Maple для решения задач упругости .....	92
14. Азанов А.В., Шурина Э.П., Энов М.И. Вычислительные схемы решения прямых задач геоэлектрики в скважинах с криволинейными границами .....	95
15. Азанов Н.П. Методы дискретной топологии в обработке изображений .....	100
16. Айдосов А.А., Данаев Н.Т., Айдосов Г.А., Заурбеков Н.С. Математическая
